CalciumSupport 20

Application

Calcium plays an important role in the growth and development of plants. It is an essential macronutrient that contributes to the stability of cell walls by strengthening cell structures, making plants more resistant to mechanical stress and diseases.

Calcium is also necessary for the regulation of cell membranes and supports intracellular signalling, which controls key physiological processes such as growth and development. Additionally, calcium helps stabilise the pH within plant cells and improves the efficiency of other nutrients, promoting overall plant health and balanced growth.

CalciumSupport 20 is applied preventively before stressful growth stages, such as before winter dormancy, prior to the stem elongation phase in spring, or as a preventive measure before periods of drought during the growing season.

Compatibility

CalciumSupport 20 can be mixed with chelated Support products, but should not be mixed with products containing sulphate or phosphate, as this may cause precipitation of calcium sulphate or calcium phosphate.

Data

pH (concentrate): 7
Minimum storage temperature: 5 °C
Density: approx. 1.25 kg/L

Content

Element	N	Vandopl. Mg	Ca
Weigth %	1,2		1,6
Grams per liter	15		20

CalciumSupport 20 per 1000 L water

	N	Ca	Mg
100 ml	1,5	2,0	
500 ml	7,5	10,0	
1000 ml	15,0	20,0	

About us

At Interfiller, we work closely with our suppliers, partners and customers to create quality products with results. For almost 50 years, Interfiller A/S has built a solid company that today produces Danish products for both horticulture and agriculture.

At Interfiller, we take pride in in-depth knowledge about the products we sell and their practical application. Chelated micronutrients ensure reduced fertilizer consumption and enable agriculture and horticulture to increase yields and improve product quality while reducing environmental impact.

Through our products, production processes and services, we work together with our customers, employees and strategic partners to contribute to a global impact that helps secure our common future.
