KartoffelSupport™

Application
KartoffelSupport™ is used to strengthen potato plants and support nutrient balance throughout the growing season. The product contains essential micronutrients in chelated form, ensuring efficient uptake and rapid response in the plant.

KartoffelSupport™ promotes strong root and tuber development, enhances photosynthesis, and helps maintain plant vitality under stress conditions such as drought or disease pressure. Regular use contributes to improved crop quality and higher yield potential.

Compatibility
KartoffelSupport™ is compatible with most crop protection products and liquid fertilisers. If in doubt, perform a jar test in a small container before mixing.

Dosage
Maximum 2.0 L/ha per application.

Soil application:
Use Support Kip-R 0.2–0.4 L/ha (see product information Support Kip-R).

Foliar feeding:
Use Support Super-ADD 0.1 L per 100 L of water (see product information Support Super-ADD).

Data
pH (concentrate): 7
Minimum storage temperature: 5 °C
Density: approx. 1.20 kg/L

Content per liter

N	P	K	S	Mg	B	Mn	Cu	Zn	Mo	Fe
					2 g	15 g*	0,7 g*	3 g*	0,2 g	15 g*

* The contents are chelated

About us

At Interfiller, we work closely with our suppliers, partners and customers to create quality products with results. For almost 50 years, Interfiller A/S has built a solid company that today produces Danish products for both horticulture and agriculture.

At Interfiller, we take pride in in-depth knowledge about the products we sell and their practical application. Chelated micronutrients ensure reduced fertilizer consumption and enable agriculture and horticulture to increase yields and improve product quality while reducing environmental impact.

Through our products, production processes and services, we work together with our customers, employees and strategic partners to contribute to a global impact that helps secure our common future.
