KoboltSupport 20

Application
KoboltSupport is used to prevent or correct cobalt deficiency and to maintain an optimal balance of trace elements in the plant. Cobalt plays an important role in the synthesis of vitamin B_{12} in soil microorganisms and is essential for nitrogen fixation in legumes.

A sufficient cobalt supply improves the activity of root nodules, leading to more efficient nitrogen fixation and healthier plant growth. KoboltSupport is particularly recommended for legumes and other nitrogen-fixing crops, but can also be used preventively in other crops where a cobalt deficiency has been identified.

The product contains chelated cobalt for optimal plant availability and efficient absorption.

Compatibility
KoboltSupport is compatible with most crop protection products and liquid fertilisers.
If in doubt, perform a jar test in a small container before mixing.

Dosage
Maximum 2.0 L/ha per application.

Soil application:
Use Support Kip-R 0.2–0.4 L/ha (see product information Support Kip-R).

Foliar feeding:
Use Support Super-ADD 0.1 L per 100 L of water (see product information Support Super-ADD).

Data
pH (concentrate): 7
Minimum storage temperature: 5 °C
Density: approx. 1.20 kg/L

Content per liter

N	P	K	S	Mg	B	Mn	Cu	Zn	Mo	Fe
							20 g*			

* The contents are chelated

About us

At Interfiller, we work closely with our suppliers, partners and customers to create quality products with results. For almost 50 years, Interfiller A/S has built a solid company that today produces Danish products for both horticulture and agriculture.

At Interfiller, we take pride in in-depth knowledge about the products we sell and their practical application. Chelated micronutrients ensure reduced fertilizer consumption and enable agriculture and horticulture to increase yields and improve product quality while reducing environmental impact.

Through our products, production processes and services, we work together with our customers, employees and strategic partners to contribute to a global impact that helps secure our common future.
