ManganSupport® 235

Application
ManganSupport is used to prevent or correct manganese deficiency and to maintain an optimal balance between manganese and other micronutrients, especially iron.

Manganese plays an essential role in photosynthesis, enzyme activation, and nitrogen metabolism, and supports strong and healthy plant development.

ManganSupport provides chelated manganese that is easily absorbed by the plant and remains available even under unfavourable soil conditions. It is particularly effective in soils with high pH or high organic matter content, where manganese availability is often limited.

The product can be applied both to the soil and as a foliar fertiliser.

Compatibility
ManganSupport is compatible with most crop protection products and liquid fertilisers. If in doubt, perform a jar test in a small container before mixing.

Dosage
Maximum 2.0 L/ha per application.

Soil application:
Use Support Kip-R 0.2–0.4 L/ha (see product information Support Kip-R).

Foliar feeding:
Use Support Super-ADD 0.1 L per 100 L of water (see product information Support Super-ADD).

Data
pH (concentrate): 7
Minimum storage temperature: 5 °C
Density: approx. 1.20 kg/L

Content per liter

N	P	K	S	Mg	B	Mn	Cu	Zn	Mo	Fe
110 g						235 g				

The contents are chelated

About us

At Interfiller, we work closely with our suppliers, partners and customers to create quality products with results. For almost 50 years, Interfiller A/S has built a solid company that today produces Danish products for both horticulture and agriculture.

At Interfiller, we take pride in in-depth knowledge about the products we sell and their practical application. Chelated micronutrients ensure reduced fertilizer consumption and enable agriculture and horticulture to increase yields and improve product quality while reducing environmental impact.

Through our products, production processes and services, we work together with our customers, employees and strategic partners to contribute to a global impact that helps secure our common future.
